

The Water Saver Urinal Tank Automatic Flusher is easy to install and easy to program.

The Water Saver Urinal Auto Flusher will dramatically reduce water consumption through smart monitoring of motion activity around stalls. Instead of flushing constantly 24 hours per day, 365 days per year, it flushes only when people are standing nearby.

The Water Saver Urinal Auto Flusher has a proven performance record. 100's of units have been installed across Canada. The WSUAF has; a water saver pause mode for higher savings, a sanitary flush cycle to eliminate odours and programmable modes with dip switch settings.

1. Sensor mounted to controller box.

2. Sensor mounted to ceiling.

3. Behind a vandal proof cover.

Here are some of the different ways of installing the Water Saver Urinal Tank Auto Flusher.

4. Mounted to the wall.
